FIELD LEVEL NOTES

Section Number: Form3_Main

Field Name: StateMCHFundsExpended

Row Name: State Funds Column Name: Expended

Year: 2007 Field Note:

This variance, a decrease of \$1,150,058 (10.9%), is due to a decrease in Match reported by local health agencies (\$888,495) and a reduction in state Maintenance of Effort

funds (\$261,563).

Section Number: Form3_Main

Field Name: ProgramIncomeExpended

Row Name: Program Income Column Name: Expended

Year: 2008 Field Note: Program Income

This variance, an increase of \$3,021,270 (67.3%), is the result of increased income earned by family planning agencies. This increase is due primarily to the substantial increase in the cost of family planning supplies, which is passed on by local provider agencies to clients via sliding fee scales. This exceptionally large increase has led to additional variances for the Children and Other Type of Individuals Served categories on Form 4 and the Direct Type of Services category on Form 5.

Section Number: Form3_Main

Field Name: ProgramIncomeExpended

Row Name: Program Income

Column Name: Expended

Year: 2007 Field Note:

This variance, an increase of \$2,021,138 (58%), is due entirely to an increase in the amount of Program Income reported by local agencies providing family

planning/reproductive health services.

FIELD LEVEL NOTES

1. Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: PregWomenExpended Row Name: Pregnant Women Column Name: Expended

Year: 2008 Field Note:

This variance, a decrease of \$864,259 (30.04%), is due to a general decrease in the number of clients in this category served with Title V dollars. This subsequently affects other components of the Federal/State Partnership. Title V funds decreased by \$208,285, Match funds by \$335,267 and Program Income fund by \$320,707.

2. Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: PregWomenExpended Row Name: Pregnant Women Column Name: Expended

Year: 2007 Field Note:

This variance, an increase of \$286,182 (19.7%), is due to an increase in the amount of Program Income reported by local agencies providing family planning/reproductive health services (\$143,247), an increase in services provided by local health agencies (\$163,795) and an increase in related state operations expenditures (\$74,144). There were decreases in the Match provided by local health agencies (\$65,376) and state Maintenance of Effort funds (\$29,628).

3. Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: Children_0_1Expended Row Name: Infants <1 year old Column Name: Expended

Year: 2007 Field Note:

This variance, a decrease of \$266,468 (10.5%), is due primarily to a decrease in related state operations (\$203,702) and a decrease in services reported by local health agencies (\$90,308). There were modest increases in Match provided by local health agencies (\$14,643) and state Maintenance of Effort funds (\$13,910). There was a slight decease in Program Income provided by local health agencies providing family planning/reproductive health services (\$1,011)

4. Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: Children_1_22Expended Row Name: Children 1 to 22 years old

Column Name: Expended

Year: 2008 Field Note:

This variance, an increase of \$1,390,773 (15.73%), is due primarily to a significant increase in Program Income in this category of \$1,527,698. This was off set slightly by minor decreases in Title V spending and Match dollars in this category.

5. Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: AllOthersExpended

Row Name: All Others Column Name: Expended

Year: 2008

Field Note:

This variance, an increase of \$2,067,974 (50.96%), is due almost exclusively to an increase in Program Income of \$1,786,906. An increase in Match funds also contributed to the variance.

6. Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: AllOthersExpended Row Name: All Others Column Name: Expended Year: 2007

Field Note:

This variance, an increase of \$631,460 (13.1%), is due primarily to increases in Program Income from local agencies providing family planning/reproductive health services (\$1,011,285) and an increase in related state operations (\$207,197). These increases were offset by decreases in services reported by local health agencies (\$125,519) and Match reported by local health agencies (\$446,275). There was a modest decrease in state Maintenance of Effort funds (\$15,228).

7. Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: AdminExpended Row Name: Administration Column Name: Expended

Year: 2008 Field Note:

This variance, an increase of \$89,964 (14.74%), is due to an error in the 2008 Budgeted calculation. The cost of one position allocated to Administration was inadvertently omitted from the total. When this cost of \$49,546 is included, the total Budgeted Administration cost increases to \$659,989. The variance then becomes \$40,418, or only 6 1%

Occurrent births: For CY 2008, according to the provisional birth file, closed 3/31/09, there were 71,275 occurrent births in Wisconsin; Wisconsin Department of Health Services, Division of Public Health, Bureau of Health Information and Policy. The count of newborns screened for CY 2008 was 70,844 (99.4%); of the occurrent births, 431 newborns were not screened. These infants were not screened for various reasons: some may have died or parents may have refused screening for religious cultural purposes.

Data Issues: NBS data files and birth certificate records are not linked. Provisional occurrent birth data indicate a small discrepancy between the numbers of babies born in Wisconsin and the numbers screened.

NBS data includes resident and occurrent births. Resident birth data are not available.

FIELD LEVEL NOTES

Section Number: Form6_Main Field Name: BirthOccurence

Row Name: Total Births By Occurence Column Name: Total Birth's By Occurence

Year: 2010 Field Note:

For CY 2008, according to the preliminary birth file there were 71,275 occurrent births in Wisconsin; these data are provisional, Wisconsin Department of Health and Family Services, Division of Public Health, Bureau of Health Information and Policy. The final count of occurrent births for 2008 is not available until the summer of 2010. The NBS data files and birth certificate records are not linked, and it is not unusual to have a discrepancy between the numbers of babies born in Wisconsin and the numbers screened

Number of Individuals Served (Unduplicated) under Title V (BY Class of Individuals and Percent of Health Coverage)

[Sec. 506(a)(2)(A)(i-ii)]

STATE: WI

Reporting Year: 2008

	TITLE V		PRIMAR	Y SOURCES OF COV	ERAGE	
Types of Individuals Served	(A) Total Served	(B) Title XIX %	(C) Title XXI %	(D) Private/Other %	(E) None %	(F) Unknown %
Pregnant Women	6,539	43.0	14.7	12.3	19.6	10.4
Infants < 1 year old	71,275	36.0	0.0	60.8	2.9	0.3
Children 1 to 22 years old	39,622	63.2	4.7	8.5	10.7	12.9
Children with Special Healthcare Needs	2,638	47.1	16.7	22.7	6.0	7.5
Others	27,339	62.4	1.9	12.4	20.0	3.3
TOTAL	147,413					
		'				

Sources: 2008 Title V program data and Reproductive Health/Family Planning (RH/FP) data come from SPHERE (Secure Public Health Electronic Record Environment), the data collection system used by agencies receiving Title V funds, 2008 NBS data from the Wisconsin State Laboratory of Hygiene, and 2008 provisional occurrent birth data from the Wisconsin Department of Health Services, Division of Public Health, Bureau of Health Information and Policy. RH/FP data include persons receiving services supported with Title V (and matching) funds and do not include Title X. RH/FP data from years prior to 2005 included individuals who received services in Title X family planning clinics whose care was partially supported with Title V matching funds. Prior to 2005, agencies supported with Title X family planning funds also received substantial Title V matching funds to support reproductive health care services. Following implementation of the Medicaid Family Planning Waiver, Title X agencies no longer received Title V matching funds. Therefore, individuals receiving services in these clinics did not have a portion of their care supported with Title V funds, and are not included in Form 7

Primary sources of health care coverage are required fields for local agencies that use SPHERE.

The data for primary sources of coverage for infants are: 1) estimates from the 2007 birth file; the 2008 birth file was not available for estimates of primary sources of coverage and NBS data do not have primary sources of coverage; and, 2) SPHERE data from 2008.

Data issues: There are many factors that affect our total numbers of individuals served (unduplicated) under Title V; therefore, from year-to-year, there are random fluctuations. Two of these factors are: data collection by local agencies and change of staff and MCH template objectives that are negotiated with local health departments each year, thereby affecting the numbers served by each agency.

FIELD LEVEL NOTES

Section Number: Form7 Main Field Name: Children_0_1_TS Row Name: Infants <1 year of age Column Name: Title V Total Served

Year: 2010 Field Note:

Data issues: Total infants <1 year of age equals: 71,275 (the 2008 provisional occurrent birth count) which includes Title V = [5,937 (646 CSHCN infants) + (5,291 infants)]. The NBS file, birth records, and SPHERE (data collection system used by agencies receiving Title V funds) are not linked; therefore, the Title V infants are included in the total number of infants because it's likely those infants were screened. The percentage of primary source of coverage for Title V infants are: Title XIX – 16.5%, Title XXI – 22.3%, Private/Other - 23.7%, None - 3.2%, Unknown - 34.0%.

Sources: Total deliveries and infants in state: 2007 resident births, Wisconsin Department of Health Services, Division of Public Health, Bureau of Health Information and Policy, 2007. The number of births that occurred to Wisconsin residents in 2007 was 72,757. The source identifying deliveries eligilbe for Title XIX is the newborns' hospital discharge records, as matched to birth records. The hospital records have the hospital's anticipated primary payer, 4,045 (5.5%) of 72,757 resident births could not be matched to a hospital discharge record. The payer for these births was estimated by assuming the proportion of known Title XIX delivieries within each race and ethnic group was the same among the unknowns.

2008 data are not available from the Bureau of Health Information and Policy until late summer 2009 or early 2010.

Eligible for Title V: 2008 Title V program data SPHERE (Secure Public Health Electronic Record Environment) and local agency reports.

FORM 10 TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT **STATE PROFILE FOR FY 2010** [SEC. 506(A)(1)]

STATE: WI

1. State MCH Administration:

The Title V MCH/CYSHCN Block Grants funds are administered by the Wisconsin Division of Public Health, Bureau of Community Health Promotion, Family Health Section. The FHS is clearly demarcated within the Division as the designee for administration of the Title V activities. This clear demarcation serves as a critical component to ensure comprehensive program activity and a single point of accountability for the state. The Family Health Section contains the MCH Unit which includes MCH and CYSHCN programs.

Local Public Health Departments

Block Grant Funds	
2. Federal Allocation (Line 1, Form 2)	\$ 10,824,984
3. Unobligated balance (Line 2, Form 2)	\$ 0
4. State Funds (Line 3, Form 2)	\$ 9,469,884
5. Local MCH Funds (Line 4, Form 2)	\$ 0
6. Other Funds (Line 5, Form 2)	\$ 0
7. Program Income (Line 6, Form 2)	\$ 7,510,211
8. Total Federal-State Partnership (Line 8, Form 2)	\$ 27,805,079

9. Most significant providers receiving MCH funds:

_	Tribal Agencies					
_	Reproductive Health Care Providers					
_	Statewide and Regional Nonprofit Agencies					
0. Individuals served by the Title V Program (Col. A, Form 7)						
a. Pregnant Women	6,539					
b. Infants < 1 year old	71,275					
c. Children 1 to 22 years old	39,622					
d. CSHCN	2,638					
e Others	27.339					

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:

Wisconsin's Title V funds are distributed to local agencies and organizations (including tribes) on an annual basis through the Division of Public Health's performance-based contracting process. The purpose of performance-based contracting is to help agencies focus on improving health status and health outcomes for Wisconsin's citizens. Performance-based contracting is a non-competitive process for our LHDs and LHDs have the first right of refusal to the allocated funds. Every fall, the Division of Public Health initiates a three-way negotiation process with representatives from the LHDs, the DPH regional office staff, and the DPH central office staff. To make the negotiation process easier, LHDs may (but are not required to) select from a list of template objectives developed specifically by the MCH/CYSHCN Program that align with Wisconsin's and National MCH priority needs for the maternal and child health population. (Template objectives are "pre-approved" activities and, as a result, streamline the negotiation process.) In 2007, the MCH/CYSHCN Program developed 35 template objectives addressing the MCH priorities as identified through the state's 2005 MCH needs assessment. Examples of templates include: pregnancy and healthy outcomes; comprehensive physical exams for uninsured or underinsured children; child passenger safety; home safety assessments; prevention and intervention for early childhood dental caries, newborn home visitation; health education activities; nutrition coalition building; and breastfeeding promotion. These template objectives are reviewed and revised yearly based on input from LHDs and partners, emerging MCH issues, and objective outcomes. If LHDs do not select a template objective(s), they have the option of creating a separate, distinct objective(s) that met the needs of the maternal and child health population within their jurisdiction. In addition, the objective must be deemed as an acceptable activity by the MCH/CYSHCN Program.

b. Population-Based Services:

Request for Proposals for statewide and regional MCH/CYSHCN projects are released on a competitive basis approximately every 5 years. In the Spring 2005, we embarked on a new competitive process with statewide program activities scheduled beginning July 1, 2005, through December 31, 2010. The five statewide projects address services to: improve infant health and reduce disparities in infant mortality; support a genetics system of care; improve child health and prevent childhood injury and death; improve maternal health and maternal care; and create a parent-to-parent matching program for families with CYSHCN. These projects perform under performance-based contracting, with some template objectives. The creation of five Regional CYSHCN Centers in January 2000 was in response to a series of assessments conducted throughout Wisconsin with families and providers along with technical assistance from national experts over the course of several years. These regional centers are funded for the same funding cycle noted above. The goal of the Centers is to establish regional leadership, as an extension of the state CYSHCN Program and enhance the local capacity to serve children and youth with special health care needs and their families and to meet the six National Performance Measures, as part of the Presidents New Freedom Initiative. Additional key model elements include: consultation, referral and follow-up; health benefits counseling; medical and dental home; training and technical assistance; and adolescent transitioning to adult care

c. Infrastructure Building Services:

(max 2500 characters)

Wisconsin's Title V dollars are at work to build systems including: family planning and reproductive health; perinatal services, newborn blood and hearing screening, early childhood comprehensive services; child health services including oral health, asthma, and injury and violence prevention; children and youth with special health care needs through the support and enhancement of services/resources of regional CYSHCN centers; parent-to-parent support network; poison control services; integration of medical home; and the MCH Hotline (1-800-722-2295) including First Step for families who have children and youth with special health care needs.

TRACKING PERFORMANCE MEASURES

[SECS 485 (2)(2)(B)(III) AND 486 (A)(2)(A)(III)]

STATE: WI

Form Level Notes for Form 11

Form 11 has columns for 2004 – 2008. After the data and accompanying note are entered into the performance measure's table, they are imported into the application's narrative (IV. C, IV. D). 2008 data were required; if 2008 data were not available, 2007 provisional data were entered with an accompanying note. Data for these measures are from several sources, including national and state surveys, and data systems maintained by the State of Wisconsin. Data for measures #1 and 12 are CY 2008. Data for measures #2, 3, 4, 5, and 6 are from the National Center for Health Statistics (NCHS) State and Local Area Integrated Telephone Survey (SLAITS) CSHCN module. Data for measures #8, 10, 13, 15, 16, 17, and 18 are for CY 2007 from the Wisconsin Department of Health Services, Bureau of Health Information and Policy; these data are maintained in retrospective state databases and are not released or published until 18 months after the end of the data year; therefore, 2008 data will not be available until mid-2009. Data for measure #7 are CY 2007 from the CDC's National Immunization Survey. Data for measure #9 were collected during the 2007-08 school year. Data for measure #14 are for CY 2008 from the CDC's Pediatric Nutrition Surveillance System. Negotiated State Performance Measures: Data for these measures are from several sources, including state surveys, national data systems, and data systems maintained by the State of Wisconsin. Data for measure #1 are from the Family Planning Program for CY 2008, data for #2 are from Medicaid data and are SFY 2009, data for #3 are from SPHERE, data for #4, 6, 7, 9, and 10 are maintained in retrospective state databases and are not released or published until 18 months after the end of the data year; therefore, 2007 data will not be available until mid-2009. Data for #5 are from the NCHS National Survey of Children's Health. Data for #8 are CY 2008 from the CDC's Pediatric Nutrition Surveillance System. 2008 data are not available until 2008, 2007 data were use for the required 2007 indicator and are marked "provisional '

PERFORMANCE	MEASURE #	Λ1
PERFURIMANCE	IVICASURE #	υı

The percent of screen positive newborns who received timely follow up to definitive diagnosis and clinical management for condition(s) mandated by their State-sponsored newborn screening programs.

1. Section Number: Form11_Performance Measure #7

Field Name: PM07 Row Name: Column Name: Year: 2008 Field Note:

The data entered for 2008 are from the National Immunization Survey for CY 2007. For Wisconsin children 19-35 months of age who had received 4 DTaP, 3 polio,1 MMR,3 Heb b and 3 Hib vaccine doses, the estimate was 79.4% with confidence intervals plus or minus 6.4%. Although the 2007 survey's immunization rate estimate for Wisconsin is slightly lower than the 2006 estimate, the difference is not statistically significant. Also, in prior survey years, large urban areas in 15 states (inc. Wisconsin) were oversampled. When this aspect of the sampling methodology was discontinued in 2007, 14 of these states (inc. Wisconsin) experienced lower rate estimates. While the precise effect of the methodological change is unknown, overall study results suggest a potentially negative impact.

2. Section Number: Form11_Performance Measure #7

Field Name: PM07 Row Name: Column Name: Year: 2007 Field Note:

The 2007 data from the National Immunization Survey show that Wisconsin's immunization estimated coverage rates for 4 DTaP, 3 Polio, 1 MMR, 3 Hep b, and 3 hib among kids 19-35 months of age rose from 83.0% in 2005 to 86.8% in 2006. This increase may be due to acceptance and use of the Wisconsin Immunization Registry (WIR).

3. Section Number: Form11_Performance Measure #7

Field Name: PM07 Row Name: Column Name: Year: 2006 Field Note:

Data issues: The most recent data from the CDC is from the National Immunization Survey (www.cdc.gov/nip under "data and statistics" and represent calendar year 2005. The vaccine coverage estimates for 2005 among Wisconsin children who were 19 to 35 months of age with 4 DTaP, 3 Polio, 1 MMR, 3 Hep b, and 3 hib doses was 82.2%. This is a slight decline from last year's estimate. The NIS states: "Remember, NIS provides estimates that include a margin of error. That's because it is a sample survey. Even though the sample is quite large -- about 30,000 children (nationally), it is just one of many possible samples. A different sample would result in a different--but probably quite similar estimate. The drop could be due to chance."

Although the national goal for 2010 is 90%, we have kept our 2010 and 2011 objectives at the same level based on program expertise.

PERFORMANCE MEASURE # 08

2. Section Number: Form11_Performance Measure #11

Field Name: PM11 Row Name: Column Name: Year: 2007 Field Note:

Source: 2007 Pediatric Nutrition Surveillance System (PedNSS), Centers for Disease Control and Prevention.

3. Section Number: Form11_Performance Measure #11

Field Name: PM11 Row Name: Column Name: Year: 2006 Field Note:

Source: According to PedNSS 2006, 77% Hispanic infants were ever breastfed compared to 63.9% white infants, 47.2% African American, 62.1% American Indian/Alaskan Native, 43.8% Asian/Pacific Islander and 59.4% multiple races; for breastfed at least 6 months, 35.1% Hispanic infants were breastfed, compared to 20.9% white infants, 10.3% African American, 18.9% American Indian/Alaskan Native, 14.4% Asian/Pacific Islander and 12.6% multiple races.

Data issue: The data for 2005 cannot be amended in the TVIS; the data entered for 2005 are incorrect and should be 2,519/10,409 = 24.2%. Source: 2005 Pediatric Nutrition Surveillance System report (PedNSS); received from CDC in mid-January 07.

The subsequent years objectives were revised to reflect 2004 and 2005 data that indicated about 25% of mothers breastfed their infants at 6 months of age. The HP 2010 objective is 50%; however, given current data and program knowledge, we feel that our objectives do not reflect current breastfeeding practices and have revised them downward.

Denominator	<i>.</i>	•			

1. Section Number: Form11_Performance Measure #12

Field Name: PM12 Row Name: Column Name: Year: 2008 Field Note:

Data on hearing screening are reported on one page of the newborn blood-spot card that goes to the Wisconsin State Lab of Hygiene (WSLH). The data are electronically messaged daily to the Wisconsin Early Hearing Detection and Intervention Tracking Referral and Coordination (WE-TRAC) system. Records for infants who show PASS/PASS results are archived; records for infants who REFER in one or both ears are queued for follow-up by the birth hospital. Reports started being generated directly from the WE-TRAC system for 2007 data. This method has allowed issues that occurred in the past, such as duplicate records that were difficult to identify as duplicates and babies with delayed screening or not screened for valid reasons but accounted for, to be corrected. Since the removal of the separable metabolic screening card, hospitals are faxing WE-TRAC users delayed hearing screening results to the WSLH. This is making our user much more responsible for updating their records accurately and in a timely fashion.

2. Section Number: Form11_Performance Measure #12

Field Name: PM12 Row Name: Column Name: Year: 2007 Field Note:

Hearing screening data are reported on the newborn blood-spot card that is sent from the birth hospital to the Wisconsin State Lab of Hygiene (WSLH). The data are electronically messaged daily to the Wisconsin Early Hearing Detection and Intervention Tracking Referral and Coordination (WE-TRAC) system. Unlike the data reported in previous years from WSLH records, the 2007 data are generated directly from the WE-TRAC system. This method has helped resolve accuracy issues involving duplicate records and delayed records that occurred in the past. The data adhere to the CDC reporting standards for EHDI statistics; i.e., the screened number excludes newborns who were missed in one or both ears, refused screening, or died before screening was possible.

3. Section Number: Form11_Performance Measure #12

Field Name: PM12 Row Name: Column Name: Year: 2006 Field Note:

Data on hearing screening are reported on one page of the newborn blood-spot card that goes to the Wisconsin State Lab of Hygiene (WSLH). The data are delivered as a space-delimited file at least once a month, converted to a SAS dataset, and used to compile monthly reports on hearing screening in Wisconsin. The hearing screening records are also sent directly to the Wisconsin Early Hearing Detection and Intervention Tracking Referral and Coordination (WE-TRAC) System.

Data issues: Hearing screening results are occasionally separated from the blood card, delaying accurate reporting. Alternatively, sometimes the blood screening is repeated, but not the hearing screening, therefore, there may be duplicate (inaccurate) reporting. In 2006 functionality was added to WE-TRAC to allow administrators to remove duplicate records from the WE-TRAC data set. Currently, we are developing reports that will allow us to take data from WE-TRAC rather than from the blood card file. This will allow for more accurate data, and will also allow us to include data on delayed inpatient screenings done for special care infants, and report on other "accounted for" babies, or babies that have a valid reason for not being screened. With these new reports and the rapid increase of hospitals reporting using WE-TRAC, we anticipate being able to use WE-TRAC data for future reporting.

Field Level Notes

1. Section Number: Form11_State Performance Measure #3

Field Name: SM3 Row Name: Column Name: Year: 2008 Field Note:

Source: SPHERE program data, 2008.

2. Section Number: Form11_State Performance Measure #3

Field Name: SM3 Row Name: Column Name: Year: 2007 Field Note:

In mid-2006, SPHERE changed to a new reporting method for collection of the ASQ:SE results, therefore, results were under reported in 2006. The 2007 increase in numbers of ASQ: SE screening results reflects improved reporting of results, as well as increased interest by LHDs in providing this screening program for young children.

3. Section Number: Form11_State Performance Measure #3

Field Name: SM3 Row Name: Column Name: Year: 2006 Field Note:

Data was transferred from SPHERE to new ASQ:SE screens but not all data came over as separate from the developmental screens. Thus data for 2006 of ASQ:SE screenings completed and results are under reported. SPHERE correction will collect sound data during 2007 and with more screening programs occurring throughout the state, more ASQ:SE screenings will be completed. It is expected that numbers reflecting age-appropriate social-emotional development of children ages 6 months to 5 years in the state will increase and better reflect progress in Wisconsin. The MCH program will monitor this situation and review the data indicating achievement for SPM#4.

Rate per 1,000 of substantiated reports of child maltreatment to Wisconsin children, ages 0 - 17, during the year.

FORM 14 LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: WI FY: 2010

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase ,list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

- 1. Disparities in Birth Outcomes: To improve birth outcomes among minority populations
- 2. Contraceptive Services (access to): To improve access and utilization to contraceptive services
- 3. Mental Health: To assure mental health services for all MCH populations
- 4. Medical Home: To assure a medical home for all children
- 5. Dental Health: To assure dental health for all children
- 6. Health Insurance and Access to Health Care: To assure health insurance and access to health care for all
- 7. Smoking and Tobacco Use: To decrease tobacco use among women and children
- 8. Intentional Childhood Injuries: To decrease intentional childhood injuries
- 9. Unintentional Childhood Injuries: To decrease unintentional childhood injuries
- 10. Overweight and At Risk for Overweight: To promote healthy lifestyles including promoting physical activity to achieve healthy weight

FORM 16 STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET STATE: WI

SP#

PERFORMANCE MEASURE: Percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver during the year.

STATUS:

Increase the percent of income eligible reproductive-age women in Wisconsin who are enrolled in the Wisconsin Medicaid Family Planning Waiver. GOAL

DEFINITION The percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver.

Numerator:

Number of women enrolled in the Family Planning Waiver

Denominator:

Number of women, ages 15-44, estimated to be Medicaid income eligible minus those who have existing

Medicaid/BadgerCare coverage.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE 9.3

Increase the proportion of females at risk of unintended pregnancy (and their partners) who use contraception.

DATA SOURCES AND DATA ISSUES

Enrollment data from Wisconsin Department of Health Services, Division of Health Care Access and Accountability,

Medicaid program data.

Access to affordable and quality contraceptive and related reproductive health services is necessary for increased use of **SIGNIFICANCE**

contraception among sexually active women and couples at risk of unintended pregnancy.

SP# 2

PERFORMANCE MEASURE: Percent of Medicaid and BadgerCare recipients, ages 3-20, who received any dental service during the reporting year.

STATUS:

Active

Goal To increase the percentage of Medicaid and BadgerCare recipients, aged 3-20, who received any dental service during the

state fiscal year.

DEFINITION Percent of Medicaid and BadgerCare recipients, aged 3-20, who received any dental service during the state fiscal year.

Numerator:

Numerator: Number of Wisconsin Medicaid and BadgerCare recipients, aged 3-20, who received any dental service during

the state fiscal year.

Denominator:

Denominator: Total number of Wisconsin Medicaid and BadgerCare, aged 3-20, recipients during the state fiscal year.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE 21-12

Increase the proportion of children and adolescents under age 19 years of age at or below 200 percent of the Federal

poverty level who received any preventive dental service during the past year.

21-10

Increase the proportion of children and adults who use the oral health care system each year.

DATA SOURCES AND DATA ISSUES Wisconsin Department of Health Services, Division of Health Care Access and Accountablility, Medicaid Program, claims

and eligibility data for services provided.

SIGNIFICANCE Oral diseases and conditions can be consequential to growth, function, ability to attend to learning, self-image and

employability. The most frequent symptom of dental pathology is pain which can distract children from learning and playing, and limit their ability to eat and speak. Extensive early childhood caries has been shown to inhibit attainment of normal weight and height in toddlers. Dental and oral diseases are increasingly understood to compromise general health and function. Dental visits increase with increasing income and parental education. Low-income children who suffer from the

most dental disease have the least access to care, despite publicly financed dental coverage.

SP# 3

SIGNIFICANCE

PERFORMANCE MEASURE: Percent of children, ages 6 months-5 years, who have age-appropriate social and emotional developmental levels.

STATUS: Active

GOAL To increase the percentage of children with age-appropriate social and emotional developmental levels.

The number of children, ages 6 months through 5 years, who have age-appropriate social and emotional developmental **DEFINITION**

Numerator:

The number of children, ages 6 months through 5 years, who have age-appropriate social and emotional developmental

Denominator:

The number of children, ages 6 months through 5 years, who receive mental health screening using the "Ages and Stages

Questionnaire: Social and Emotional Domain during the reporting period (ASQ:SE)."

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE

18-7 Increase the proportion of children with mental health problems who receive treatment.

Secure Public Health Electronic Record Environment (SPHERE) data reported by agencies who perform mental health **DATA SOURCES AND DATA ISSUES**

screening for young children using the "Ages and Stages Questionnaire®: Social-Emotional (ASQ:SE)". This

questionnaire/screening tool assesses children's social-emotional development at 6, 12, 18, 24, 30, 36, 48, and 60 months.

Infant and early childhood mental health is of growing interest in public health. Wisconsin Governor Jim Doyle's KidsFirst Initiative recommends implementation of the Wisconsin Infant and Early Childhood Mental Health Plan developed by the Wisconsin Initiative for Infant Mental Health. One of the key recommendations is mental health screening and referral for children birth to age five. SPHERE collects information on developmental screening provided by POCAN, Home Visitation Outcomes Projects, and Title V-funded projects (local health departments and private non-profits including CYSHCN Regional Centers and Regional Center contractees), and Tribal Agencies (Honoring our Children). POCAN is the acronym for the comprehensive targeted home visiting program authorized under 46.515 Wisconsin statutes and stands for

Prevention of Child Abuse and Neglect. In 2004, 2,662 Wisconsin children under six years of age received a developmental

assessment.

PERFORMANCE MEASURE: Rate per 1,000 of substantiated reports of child maltreatment to Wisconsin children, ages 0 - 17, during the year.

STATUS: Active

GOAL To decrease the number of children, ages 0-17, being maltreated in Wisconsin during the reporting year.

DEFINITIONThe number of substantiated reports of child maltreatment to Wisconsin children, ages 0-17, during the calendar year.

Numerator:

The number of child abuse and neglect reports and substantiations in a given calendar year.

Denominator:

The number of children under age 18.

Units: 1000 Text: Rate

HEALTHY PEOPLE 2010 OBJECTIVE

15-33

Reduce maltreatment and maltreatment fatalities of children.

15-34

Reduce the rate of physical assault by current or former intimate partners (for persons 12 and older).

DATA SOURCES AND DATA ISSUES

Annual Report to the Govenor and Legislature on Wisconsin Child Abuse and Neglect, Bureau of Program Integrity, Division

of Safety and Permanence, Division of Children and Family Services.

SIGNIFICANCE

Child maltreatment has physical, psychological, behavioral and societal consequences that can lead into long-term physical

and mental health problems and economic consequences.

SP # 5

PERFORMANCE MEASURE: Percent of children who receive coordinated, ongoing comprehensive care within a medical home.

STATUS: Active

GOAL To increase the percentage of Wisconsin children who have a medical home.

DEFINITIONThe American Academy of Pediatrics describes care from a medical home as accessible, continuous, coordinated, family-

centered, comprehensive, compassionate and culturally-competent.

Numerator

Weighted number of children from the National Survey of Children's Health, National Center for Health Statistics, Centers

for Disease Control and Prevention.

Denominator:

Weighted number of children from the National Survey of Children's Health, National Center for Health Statistics, Centers

for Disease Control and Prevention.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE

1-4. Access to quality health services.

Increase the proportion of persons who have a specific source of ongoing care.

DATA SOURCES AND DATA ISSUES

National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.

SIGNIFICANCE

A medical home is an approach to providing continuous and comprehensive primary care in a high-quality and cost-effective

manner

PERFORMANCE MEASURE: Percent of children less than 12 years of age who receive one physical exam a year.

STATUS: Active

GOAL Increase the percent of children less than 12 years of age who receive one physical exam per year.

DEFINITION The percent of children less than 12 years of age who receive one physical exam a year.

Numerator: Weighted number of children who received at least one physical exam within the past year.

Denominator:

Census estimate of children during calendar year.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

SIGNIFICANCE

Wisconsin Department of Healthy Services, Bureau of Health Information and Policy, Wisconsin Family Health Survey.

Health maintenance through primary care services, including well child check-ups results in early detection and treatment of health problems and improves the chances of leading a healthy life. The implementation of Wisconsin's Children's Health Insurance Program (BadgerCare) will increase health care utilization by children birth to 12 years of age.

PERFORMANCE MEASURE: Percent of women who use tobacco during pregnancy.

STATUS: Active

GOAL Decrease the percent of women who use tobacco during pregnancy.

DEFINITION

Numerator:Number of women who self-report the use of tobacco during pregnancy during the calendar year.

Denominator:

Total number of live births to Wisconsin women per calendar year.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Wisconsin birth certificate data file.

SIGNIFICANCE

Wisconsin's maternal smoking rate (16.5% in 2000) is above the national average (12.2% in 2000). Poor pregnancy outcomes due to maternal smoking are well documented. These substances can endanger the pregnancy and the newborn's health (low birth weight, higher risk of unsuccessful pregnancy and premature birth, and other health problems).

PERFORMANCE MEASURE: Percent of children, ages 2-4, who are obese or overweight at or above the 95th percentile.

STATUS: Active

GOAL To reduce the percent of children, ages 2-4, who are obese or overweight

DEFINITIONThe percentage of children, ages 2 to 5 years, receiving WIC services who are obese or overweight at or above the 95th

ercentile.

Numerator:

Unduplicated number of enrolled WIC participants who are children, ages 2-4, in Wisconsin at => 95 percentile during the

reporting period.

Denominator:

Unduplicated number of enrolled WIC participants who are children, ages 2-4, in Wisconsin during the reporting period.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

SIGNIFICANCE

CDC, Pediatric Nutrition Surveillance System (PedNSS)/WIC data.

Childhood and adolescent obesity can lead to negative psychosocial and medical conditions. Medical conditions related to child and adolescent obesity can be both short and long-term. Overweight and obese children are at risk for sleep apnea, orthopedic complications, Type 2 diabetes, and elevated levels of cholesterol, blood pressure, triglycerides, and fasting insulin. Overweight adolescents have a 1.5 to 2-fold increased risk for being overweight as adults. As a result, they are also at increased risk for long-term medical conditions such as coronary heart disease, colon cancer, diabetes, asthma, and

rthritis.

PERFORMANCE MEASURE: Ratio of the black infant mortality rate to the white infant mortality rate.

STATUS: Active

GoaL To reduce the disparity (ratio) between the black and white infant mortality rates.

DEFINITION Ratio of the black infant mortality rate to the white infant mortality rate.

Numerator:

The black infant mortatlity rate per 1,000 live births during the reporting period (most recent data for calendar year).

Denominator:

The white infant mortality rate per 1,000 live births during the reporting period (most recent data for calendar year).

Units: 1 Text: Ratio

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

State vital records.

SIGNIFICANCE

A significant gap exists in Wisconsin between the infant mortality rates (IMR) of African American and white infants. Infants born to African American women in Wisconsin are almost three times as likely to die in the first year of life than infants born to white mothers. This disparity of 3 to 1 exceeds the disparity of 2.4 to 1 for the nation as a whole. Although the overall IMR for Wisconsin declined from 17 infant deaths per 1,000 live births in 1970 to 7.2 per 1,000 in 1998, the IMR for African American babies hovered near 18 per 1,000 live births for the last decade. The IMR for whites was 5.6 infant deaths per 1,000 live births in 1998 compared to the block rate of 17.9 per 1,000 live births. This trend continued in 1999 and 2000.

PERFORMANCE MEASURE: Death rate per 100,000 among youth, ages 15-19, due to motor vehicle crashes.

STATUS: Active

GOAL To decrease the number of deaths to youths, ages 15-19, due to motor vehicle crashes.

DEFINITION

Numerator:The number of deaths from motor vehicle crashes in Wisconsin to youths, ages 15-19, during the reporting period.

Denominator:

The number of youths in Wisconsin, ages 15-19, during the reporting period.

Units: 100000 Text: Rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Wisconsin death certificate data file.

SIGNIFICANCE

Motor vehicle crashes are the leading cause of death for youth. Wisconsin's young drivers are more likely to be in a motor vehicle crash than any other age group.

Is the Data Provisional or Final?				Final	Final

Field Level Notes

1. Section Number: Form17_Health Systems Capacity Indicator #08

Field Name: HSC08 Row Name: Column Name: Year: 2008 Field Note:

The denominator, 15,793 is in a report from the Social Security Administration and the numerator is the same. Data Issue: All SSI beneficiaries less than 16 years old are automatically eligible for Wisconsin's Medicaid Program which provides comprehensive rehabilitative services. This indicator is consistent with other states with universal Medicaid coverage for these services. Titles V's role is focused on assuring families are aware of and enrolled in SSI. As such, under an MOU agreement, the Disability Determination Bureau of SSA electronically provides the CYSHCN program names and addresses of children under age 16 who have applied for SSI benefits. The CYSHCN program provided information and resource materials to 2,040 families who made application to SSI. Direct services were provided to 248 clients less than 16 years of age on SSI through agencies reporting in SPHERE.

2. Section Number: Form17_Health Systems Capacity Indicator #08

Field Name: HSC08 Row Name: Column Name: Year: 2007 Field Note:

The denominator, 15,289 is in a report from the Social Security Administration and the numerator is the same. Data Issue: All SSI beneficiaries less than 16 years old are automatically eligible for Wisconsin's Medicaid Program which provides comprehensive rehabilitative services. This indicator is consistent with other states with universal Medicaid coverage for these services. Titles V's role is focused on assuring families are aware of and enrolled in SSI. As such, under an MOU agreement, the Disability Determination Bureau of SSA electronically provides the CYSHCN program names and addresses of children under age 16 who have applied for SSI benefits. In 2007, 2,416 families were sent information from the CYSHCN program about the regional CYSHCN Centers, Family Voices, Birth to 3 and other disability resources, whether or not they were found eligible for SSI.

3. Section Number: Form17_Health Systems Capacity Indicator #08

Field Name: HSC08 Row Name: Column Name: Year: 2006 Field Note:

The denominator, 14,590 is in a report from the Social Security Administration and the numerator is the same. Data Issue: All SSI beneficiaries less than 16 years old are automatically eligible for Wisconsin's Medicaid Program which provides comprehensive rehabilitative services. This indicator is consistent with other states with universal Medicaid coverage for these services. Titles V's role is focused on assuring families are aware of and enrolled in SSI. As such, under an MOU agreement, the Disability Determination Bureau of SSA electronically provides the CYSHCN program names and addresses of children under age 16 who have applied for SSI benefits. In 2006, 2,685 families were sent information from the CYSHCN program about the regional CYSHCN Centers, Family Voices, Birth to 3 and other disability resources, whether or not they were found eligible for SSI.

FORM 18 HEALTH SYSTEMS CAPACITY INDICATOR #05 (MEDICAID AND NON-MEDICAID COMPARISON) STATE: WI

INDICATOR #05 Comparison of health system capacity	V=45			POPULATION			
indicators for Medicaid, non-Medicaid, and all MCH populations in the State	YEAR	DATA SOURCE	MEDICAID	NON-MEDICAID	ALL		
a) Percent of low birth weight (< 2,500 grams)	2007	Matching data files	8.8	5.8	6.9

INDICATOR #06 The percent of poverty level for eligibility in the State's Medicaid programs for infants (0 to 1), children, Medicaid and pregnant women.	YEAR	PERCENT OF POVERTY LEVEL MEDICAID (Valid range: 100-300 percent)
a) Infants (0 to 1)	2008	185_
b) Medicaid Children (Age range 1 to 18) (Age range to) (Age range to)	2008	185
c) Pregnant Women	2008	185

FORM 18 HEALTH SYSTEMS CAPACITY INDICATOR #06(SCHIP ELIGIBILITY LEVEL) STATE: WI

INDICATOR #06 The percent of poverty level for eligibility in the State's SCHIP programs for infants (0 to 1), children, SCHIP and pregnant women.	YEAR	PERCENT OF POVERTY LEVEL SCHIP
a) Infants (0 to 1)	2008	
b) Medicaid Children (Age range 1 to 18) (Age range to) (Age range to)	2008	
c) Pregnant Women	2008	

FORM NOTES FOR FORM 18

In 2007, there were 72,757 resident live births in Wisconsin. Of these, 68,712 (94.4%) resident births were matched with a birth-to-hospital-record match; The hospital record is the only available sources for payer information. 4,045 of 72,757 resident births could not be matched to a hospital discharge record.

FIELD LEVEL NOTES

1. Section Number: Form18_Indicator 05

Field Name: CareFirstTrimester

Row Name: Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester

Column Name: Year: 2010 Field Note:

In 2007, there were 72,757 resident live births in Wisconsin. Of these, 68,712 (94.4%) resident births were matched with a birth-to-hospital-record match; The hospital record is the only available sources for payer information. 4,045 of 72,757 resident births could not be matched to a hospital discharge record.

2. Section Number: Form18_Indicator 05

Field Name: AdequateCare

Row Name: Percent of pregnant women with adequate prenatal care

Column Name: Year: 2010 Field Note:

In 2007, there were 72,757 resident live births in Wisconsin. Of these, 68,712 (94.4%) resident births were matched with a birth-to-hospital-record match; The hospital record is the only available sources for payer information. 4,045 of 72,757 resident births could not be matched to a hospital discharge record.

FORM 19 HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM STATE: WI

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Informatioin)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	Yes
Annual linkage of birth certificates and WIC eligibility files	2	Yes
Annual linkage of birth certificates and newborn screening files	2	Yes
REGISTRIES AND SURVEYS Hospital discharge survey for at least 90% of in-State discharges	2	Yes
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

- 1 = No, the MCH agency does not have this ability.
 2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
 3 = Yes, the MCH agency always has this ability.

FORM 19 HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM STATE: WI

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)		
Youth Risk Behavior Survey (YRBS)	3	No		
Other: Wisconsin Youth Tobacco Survey	2	Yes		

*Where: 1 = No

2 = Yes, the State participates but the sample size is <u>not</u> large enough for valid statewide estimates for this age group. 3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

FORM NOTES FOR FORM 19

None

FIELD LEVEL NOTES

1. Section Number: Form19_Indicator 09A

Field Name: RecentMother

Row Name: Survey of recent mothers at least every two years (like PRAMS)

Column Name: Year: 2010 Field Note:

Wisconsin was awarded PRAMS in April 2006; our first survey to mothers who had a live birth in 2007 was mailed in mid-May 2007. We have finished our second year of data collection for 2008. We expect to have data for analysis in mid-2009. Wisconsin PRAMS is a collaborative project between the Bureaus of Health Information and Policy and Community Health Promotion (which administers Title V, Division of Public Health).

2. Section Number: Form19_Indicator 09B

Field Name: YRBSS_09B

Row Name: Youth Risk Behavior Survey (YRBS)

Column Name: Year: 2010 Field Note:

The Wisconsin Youth Risk Behavior Survey (YRBS) is administered every other year by the Wisconsin Department of Public Instruction in collaboration with the Wisconsin Division of Public Health; the 2007 survey is the most recent one available.

3. Section Number: Form19_Indicator 09B

Field Name: Other1_09B Row Name: Other Column Name: Year: 2010 Field Note:

The Wisconsin Youth Tobacco Suvey is a comprehensive measure of youth awareness, attitudes, and related behaviors about tobacco in Wisconsin. The survey is conducted in both public middle and high schools during the spring semester of even years (2008, 2010).

Field Name: HSI02A Row Name: Column Name: Year: 2006 Field Note:

Source: Wisconsin Department of Health and Family Services, Division of Public Health, Bureau of Health Information and Policy, Wisconsin Interactive Statistics on Health (WISH) data query sytem, http://dhfs.wisconsin.gov/wish/, Birth Counts Module, accessed 4/11/2008.

HEALTH STATUS INDICATOR MEASURE # 02B							
The percent of live singleton births weighing less than 1,500 grams.							
		Annual Indicator Data					
	2004	2005	2006	2007	2008		
Annual Indicator	0.9	1.0	1.0	0.9	0.9		
Numerator	634	661	683	653	653		
Denominator	67,856	68,655	70,045	70,499	70,499		
Check this box if you cannot report the numerator because 1. There are fewer than 5 events over the last year, and 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied. (Explain data in a year note. See Guidance, Appendix IX. Is the Data Provisional or Final?				Final	Provisional

Percent Below: 50% of poverty	5.6
100% of poverty	<u>16.7</u>
200% of poverty	31.8

FORM NOTES FOR FORM 21

Data for Form 21 are from several sources, including the US Census, Wisconsin governnment agencies (Departments of Health Services, Public Instruction, and Office of Justice Assistance).

HSI#06A: US Census

HSI#07A: 2007 data. In Wisconsin, all live births were classified by race or Hispanic origin of mother into one of six categories: non-Hispanic white, non-Hispanic black/African American, non-Hispanic American Indian, Hispanic/Latino, non-Hispanic Laotian/Hmong, and non-Hispanic other (which are mostly Asian). Wisconsin Department of Health and Family Services, Division of Public Health, Bureau of Health Information and Policy.

HSI#08A: 2007 data. Wisconsin Department of Health Services, Division of Public Health, Bureau of Health Information and Policy.

HSI#09A: The form has a checkbox for whether the data are provisional or final; the data for this form are both provisional and final - depending on the indicator; to clear the form, we checked "provisional". The data for this form come from several sources. Classification of data indicators as required by race/ethnicity are difficult because the race/ethnic classifications are not standardized across agencies.

HSI#10: US Census. HSI#11: US Census. HSI#12: US Census.

FIELD LEVEL NOTES

1. Section Number: Form21_Indicator 07A

Field Name: Race_Women35 Row Name: Women 35 or older

Column Name: Year: 2010 Field Note:

There were 12 infants born to women of unknown age: White - 3, Other & Unknown - 9; therefore, the total is 72,757 live births.

 Section Number: Form21_Indicator 09A Field Name: HSIRace_Children Row Name: All children 0 through 19

Column Name: Year: 2010 Field Note:

Source: Wisconsin Dept. of Health and Family Services, Division of Public Health, Bureau of Health Information and Policy. Wisconsin Interactive Statistics on Health (WISH) data query system, http://dhfs.wisconsin.gov/wish/. Population Module, accessed 04/01/09.

3. Section Number: Form21_Indicator 09A Field Name: HSIRace_SingleParentPercent

Row Name: Percent in household headed by single parent
